“Before ordering a new line we were able to test the equipment with our own bread products.”

INTER EUROPOL (POLAND)

Rüdiger Stollmeier
Project Manager

INTER EUROPOL is a family-owned company and market leader in Poland for frozen bakery and pastry products. What started in 1989 with a bread delivery service in Warsaw, has nowadays become a national reference. Their products are valued throughout the European Union, as well as in many other countries across the globe.

Inter Europol employs more than 1500 people in two factories in Poland: one located in Marki, producing only bread products and one located in Malopole, producing all kinds of snacks, pastry and bakery products. Inter Europol already owns 11 fully equipped packaging lines from Pattyn.

Rüdiger Stollmeier explains: “We have been working with Pattyn Bakery Division, for over 10 years now. They have always been and still are market leader in turnkey solutions for the

packaging and counting of bread and pastry products. As our company concept relies on traditional products, produced and packed with modern technology, Pattyn has established itself as our main partner for all our facilities and lines.

The reason we have chosen Pattyn for our bread lines was obvious: they are the only ones who can offer a **large and suitable range of robotic packaging lines** for this industry. In the near future the use of robots will only increase, so we really wanted to integrate them now to be a step forward. Robots, assisted by Pattyn’s **well-proven vision system**, are picking up the products and organising them into the boxes on different levels.

Additionally, the lines include box lining equipment such as a combined case erector - bagmaker inserter, bag sealer, checkweigher and case closer to offer a complete turnkey solution.

Before ordering a new line we were able to test the robotic equipment with our own bread products. This made it possible to **adapt the equipment to our**

specific needs. There’s nothing alike among other providers in this industry.

Pattyn really makes the difference with its exceptional service.

Recently they even hired a service specialist for the Polish market to quickly respond to customers demands.

We look forward to our future relationship based on a **long-term cooperation, trust and achieved challenges.**”

Rüdiger Stollmeier concluded: “Our facilities in Poland are often visited by customers and professionals. With pleasure we recommend Pattyn and we will continue to do so in the future.”

“Our facilities in Poland are often visited by customers and professionals. With pleasure we recommend Pattyn and we will continue to do so in the future.”

PRODUCT & CONTAINERS

- Bread products packed into lined boxes.

CHALLENGE

- Installation of robotic lines using the latest technology.

RESULTS

- Fully automated lines.
- Efficient packaging using 3D vision and robotics.
- Perfect product organizing into boxes.
