

“The ZIM-11 bag inserter is even more compact than a manual working station”.

MASSILLY SCANDINAVIA A/S
(DENMARK)

Ole Aksel Hansen
Production Manager

MASSILLY SCANDINAVIA is part of the France concern Massilly Group, with a history that goes back to 1911. They are specialized in manufacturing all kinds of metal packaging such as: sealing caps, tin food cans, aerosols, decorated cans,... Today Massilly has production units in several locations worldwide. In Denmark Massilly produces sealing

caps in metal and aluminum in 3 shifts, with a yearly production of app. 300 to 350 mill caps or 350.000 to 400.000 boxes a year.

Ole Aksel Hansen explains:
“In order to achieve a higher line efficiency and improve the working environment for the operator, we were looking for an automatic bag inserter for RC-boxes, which could easily be integrated in our layout. After the presentation of Pattyn’s extremely compact bag inserter ZIM-11, our decision was quickly taken. As a matter of fact, the ZIM-11 is even more compact than the space needed for doing

this operation manually. On top of that we could install the ZIM-11 ourselves. After installation in August 2012 the ZIM-11 has and is still doing its job absolutely perfect.”

“My recommendation: Buy.”

PRODUCT & CONTAINERS

- Sealing caps

CHALLENGE

- Compact machine
- Easy to use

RESULTS

- Improve line efficiency
- Improve working environment
- Reduce bag cost
