TECHNICAL SPECIFICATIONS ARGOFLEX-41

3D and color vision technology

- Highly accurate 3D scanning system to guarantee the product shape
- Non-conform products are identified and will not be picked
- Argo3D® inside: newest generation of 3D stereovision

Flexibility

- Customized solutions for different container types: american boxes, (plastic) trays, ...
- Ability to feed a flow wrapper or any horizontal packing machine
- Empty boxes are buffered upstream into each filling station to guarantee continuous operation of the robots
- Containers are conveyed short side leading for an optimal flow
- Possibility to create a specific pattern or layer on a belt

Robot picking system

- Unique Pattyn softwares maximizes robot efficiency
- Minimal interference with the products and maximal speed thanks to delta robots
- Wide variety of customized grippers to offer the best solution for your product

Product handling

- Single pick / single place picking
- Only conform products are picked, non-conform products are collected at the end of the line.

Handling of bulk products

- Direct bulk filling station MEC-11 optionally available
- The combination of the 3D vision counting and an optional bottom-up-finger system separates the product flow accurately into batches

CAPACITIES PER ROBOT (UP TO)			
Max Rate	4500 p/h		
Max Product Weight	1.7 lbs		
CONSUMPTION PER ROBOT STATION			
Installed power	4 kW	Voltage	3 x 400 V + E / 50 Hz
Air supply	6bars	Air consumption	Configuration dependent
CONSTRUCTION			
Painted steel construction			
Open frame for product conveyor up to 59" width			
Weight 1763 kg (one station with 1 robot)			
OPTIONS (More options available, please contact Pattyn)			
Product conveyor width			
Gripper			
4K linear color camera for aspect control			

3D Vision

Delta robot

Grippers customized to your product
