

Turnkey solutions
to pack vegetables into
cartons & pallet containers

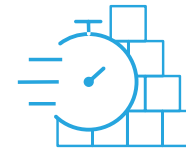

Increase your efficiency

To meet **food safety standards**, it is important to invest in a **reliable and automated packaging solution**. Therefore Pattyn has developed a unique range of packaging machines to automate the packaging and filling of bulk products into different containers.

Thanks to these machines, **seasonal dependency challenges are resolved** because of the ability to handle large quantities at high speed. We have complete solutions for packaging in **5-25 kg boxes** as well as **octabins** and **big wooden boxes**.

24/7 operation and no worries about product and packaging quality.

High line autonomy thanks to the use of made-to-measure bags from a reel.

Solution adapted to your product and capacity

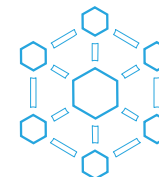

Gentle product treatment

50 years of experience in bag-in-box packaging

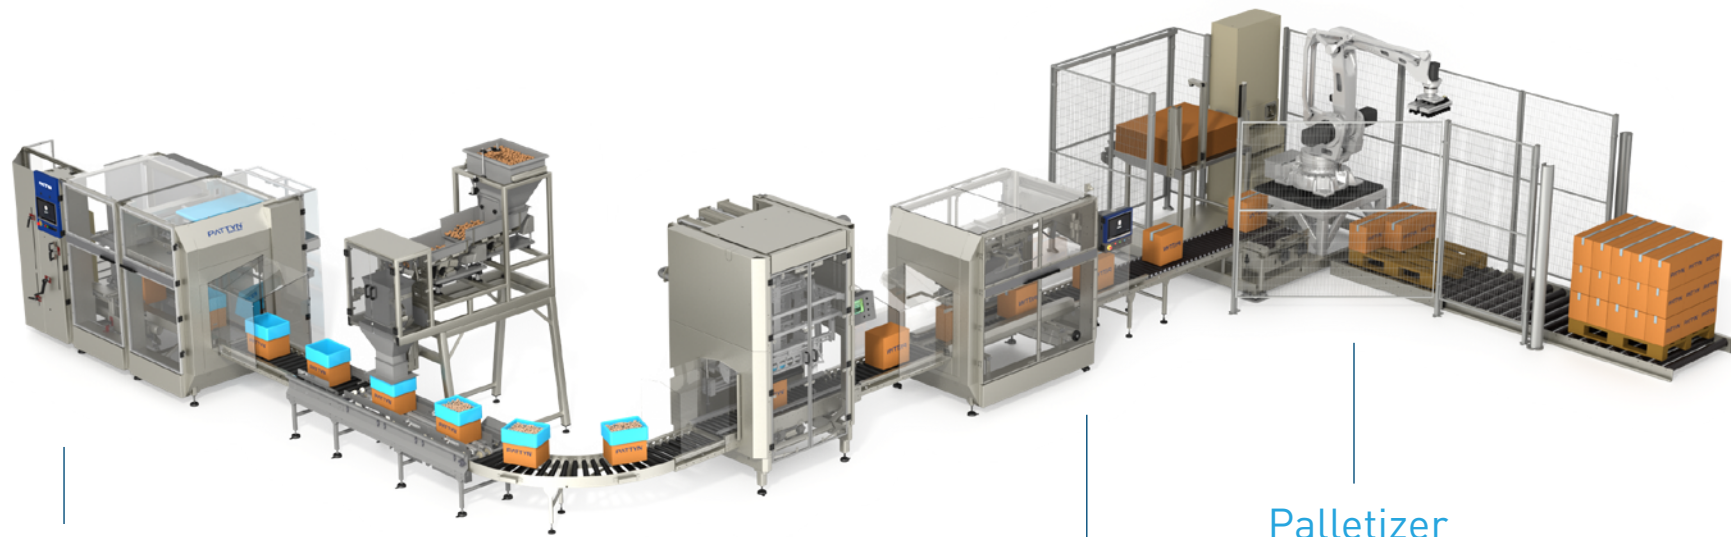

100% Pattyn-made

Full project management for turnkey solutions

Vegetables standard packing line

Case Erector -
